Part III DETAILED ACTION

Specification

The status of copending applications should be updated in the specification.

Applicants are reminded that 37 CFR 1.121(b)(1)(iii) requires that a separate version of the replacement paragraph(s) accompany any amendment to the specification showing the changes relative to the previous version. Applicants failed to provide separate marked up version of the substitute abstract. It is requested that applicants supply the required marked up version in response to this action.

Double Patenting¹

Claims 37-47 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,342,642. Although the conflicting claims are not identical, they are not patentably distinct from each other because 1) the claims clearly overlap and 2) the claims read on obvious variants such as homologues and isomers.

¹ The obviousness-type double patenting rejection is a judicially established doctrine based upon public policy and is primarily intended to prevent prolongation of the patent term by prohibiting claims in a second patent not patentably distinct from claims in a first patent. *In re Vogel*, 164 USPQ 619 (CCPA 1970). A timely filed terminal disclaimer in compliance with 37 C.F.R. § 1.321(b) would overcome an actual or provisional rejection on this ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 C.F.R. § 1.78(d).
